Author Index (Vol. 14)

Al-Mahdawi, S., J.V. Forrester and W.R. Lee (A simplified method for the isolation of highly purified bovine retinal S antigen), 99
Anderson, K., *see* Liu, H.M., 49
Antel, J.P., *see* Reder, A.T., 183
Antoniou, A.V., D. Baker, E. El-Sady, J.L. Turk, B.T.G. Tan and R.J. Scheper (Identification and quantitation of the expression of T cell surface markers during the development of chronic relapsing experimental allergic encephalomyelitis (CREAE) in the guinea pig), 293
Appel, M.J.G., *see* Summers, B.A., 227
Axthelm, M.K., *see* Johnson, G.C., 61

Baba, H., *see* Miyatani, N., 189
Bach, J.-F., *see* Morel, E., 221
Baker, D., *see* Antoniou, A.V., 293
Band, H., S. Sinha and G.P. Talwar (Inhibition of the interaction of mycobacteria with Schwann cells by antimycobacterial antibodies), 235
Bartlett, P.F., *see* Lappuke, R., 317
Benjamins, J.A., R.E. Callahan, I.N. Montgomery, D.M. Studzinski and C.A. Dyer (Production and characterization of high titer antibodies to galactocerebroside), 325
Benjamins. J.A., *see* Rauch, H.C., 35
Bernard, C.C.A., *see* Lappuke, R., 317
Brosnan, J.V., R.I. Craggs, R.H.M. King and P.K. Thomas (Reduced susceptibility of T cell-deficient rats to induction of experimental allergic neuritis), 267
Buskirk, D., *see* Friedman, J., 1

Callahan, R.E., *see* Benjamins, J.A., 325
Carrel, S., *see* Pulver. M., 123
Caterson, B., *see* Liu, H.M., 49
Coyle, P.K. and P.A. Sibony (Viral specificity of multiple sclerosis tear immunoglobulins), 197
Craggs, R.I., *see* Brosnan, J.V., 267

de Tribolet, N., *see* Pulver, M., 123
Dörries, D., R. Watanabe, H. Wege and V. ter Meulen (Analysis of the intrathecal humoral immune response in Brown Norway (BN) rats, infected with the murine coronavirus JHM), 305
Dyer, C.A., *see* Benjamins, J.A., 325

Ellison, G.W., *see* Moody, D.J., 161, 175
El-Sady, E., *see* Antoniou, A.V., 293

Fahey, J.L., *see* Moody, D.J., 1975
Fallis, R.J., M.L. Powers, M.-s. Sy and H.L. Weiner (Adoptive transfer of murine chronic-relapsing autoimmune encephalomyelitis — Analysis of basic protein-reactive cells in lymphoid organs and nervous system of donor and recipient animals), 205
Forrester, J.V., *see* Al-Mahdawi, S., 99
Frelinger, J.A., *see* Ting, J.P.-Y., 87
Friedman, J., D. Buskirk, L.J. Marino, Jr. and J.B. Zabriskie (The detection of brain antigens within the circulating immune complexes of patients with multiple sclerosis), 1
Fujinami, R.S., *see* Love, S., 19

Gibbs, M.E., *see* Lappuke, R., 317
Goldstein, M.E., L.A. Sternberger and N.H. Sternberger (Varying degrees of phosphorylation determine microheterogeneity of the heavy neurofilament polypeptide (Nf-H)), 135
Goldstein, M.E., N.H. Sternberger and L.A. Sternberger (Phosphorylation protects neurofilaments against proteolysis), 149
Goust, J.M., *see* Verselis, S.J., 75
Grable, E., *see* Moody, D.J., 175
Graves, M.C., *see* Walsh, M.J., 243
Griffin, D.E., *see* Laskin, O.L., 283

Harb, W., *see* Rauch, H.C., 35
Hinman, C.L., *see* Rauch, H.C., 35

Journal of Neuroimmunology, 14 (1987) 350–353
Elsevier

Subject Index (Vol. 14)

Acetylcholine receptor
–, Autoimmunity; Muscle contraction; Myasthenia gravis, 253
Albumin leakage
–, (Cerebrospinal fluid); (Blood-brain barrier); Canine distemper; Morbillivirus, 61
Anti-AChR antibody
–, Myasthenia gravis; (Associated diseases); (Thymus), 221
Antibody
–, Galactocerebroside; Oligodendroglia; Peanut agglutination; (ELISA), 325
Antibody against myelin basic protein
–, Theiler's murine encephalomyelitis virus; (Cerebrospinal fluid); (Mice), 35
Antibody synthesis, intracthecal
–, (Brown Norway rat); Coronavirus JHM; (Isoelectric focusing), 305
Antigen
–, Multiple sclerosis; Immune complex; (Brain); Measles virus; (Cross-reactive), 1
Antigen-presenting cell
–, Astrocyte; HLA-DR antigen; Interferon-γ; Interleukin-1, 123
Antigen-reactive cell
–, Relapsing experimental allergic encephalomyelitis; Myelin basic protein; (Frequency analysis); (Compartmentalization), 205
Antiserum
–, Schwann cell; Phagocytosis; Mycobacterium; Macrophage, 235
Astrocyte
–, HLA-DR antigen; Interferon-γ; Antigen-presenting cell; Interleukin-1, 123
Autoimmune disease
–, Monoclonal antibody; T lymphocyte, 339
Autoimmunity
–, Acetylcholine receptor; Muscle contraction; Myasthenia gravis, 253
–, Experimental allergic neuritis; T cell-deficient rat; (Peripheral nervous system), 267
B lymphoid cell line
–, Interleukin-2; $CD4^+$ T cell; Multiple sclerosis, 75
Calcium-independent neurofilament protease
–, Neurofilament conformation; Monoclonal antibody; (Peroxidase-monoclonal antiperoxidase technique), 149
Canine distemper
–, Albumin leakage; (Cerebrospinal fluid); (Blood-brain barrier); Morbillivirus, 61
–, Virus; Myelin basic protein; (Cerebrospinal fluid); Demyelination, 227
$CD4^+$ T cell
–, Interleukin-2; B lymphoid cell line; Multiple sclerosis, 75
CD8 gene
–, Leu-2; OKT8; Multiple sclerosis; Suppressor cell; Concanavalin A-induced suppressor cell, 183
Concanavalin A
–, CD8 gene; Leu-2; OKT8; Multiple sclerosis; Suppressor cell, 183
Coronavirus JHM
–, (Brown Norway rat); Intrathecal antibody synthesis; (Isoelectric focusing), 305
Cyclophosphamide
–, Immunosuppression; Multiple sclerosis; Lymphocyte; T cell subset, 175
–, Multiple sclerosis; Lymphocyte; Immunosuppression, 161
Demyelinating disease
–, Radiation; Theiler's virus; Hepatitis virus; (Mouse); Viral reactivation, 19
Demyelination
–, Canine distemper virus; Myelin basic protein; (Cerebrospinal fluid), 227
ELISA antibody
–, Human poliovirus; (Mice); Immunoprecipitating antibody, 109

0165-5728/87/$03.50 © 1987 Elsevier Science Publishers B.V. (Biomedical Division)

Encephalitis
–, IgG; IgA; Herpes simplex type 1 virus; (Rabbit); (Cerebrospinal fluid), 283
Encephalomyelitis, chronic experimental allergic
–, T cell surface marker; Monoclonal antibody; (Guinea pig), 293
Encephalomyelitis, relapsing experimental allergic
–, Myelin basic protein; (Frequency analysis); (Compartmentalization); Antigen-reactive cell, 205
Ependymoblastoma
–, (Murine); Major histocompatibility complex antigen, class 1; (Expression); (Detection); Neuroblastoma; (Murine), 87

Flavonoids
–, Second International Symposium; (Announcement), 346

Galactocerebroside
–, Antibody, Oligodendroglia; Peanut agglutination; (ELISA), 325
Ganglioside
–, Paraproteinemia; Polyradiculoneuropathy; Lymphoma, 189
Glycoconjugate
–, Mannose-rich; Keratan sulfate proteoglycan; (Corpora amylacea); (Brain); Immunocytochemical method; Lectin-binding method, 49

Hepatitis virus
–, Radiation; Theiler's virus; (Mouse); Demyelinating disease; Viral reactivation, 19
Herpes simplex type 1 virus
–, IgG; IgA; Encephalitis; (Rabbit); (Cerebrospinal fluid), 283
HLA-DR antigen
–, Astrocyte; Interferon-γ; Antigen-presenting cell; Interleukin-1, 123

IgA
–, IgG; Encephalitis; Herpes simplex type 1 virus; (Rabbit); (Cerebrospinal fluid), 283
IgG
–, IgA; Encephalitis; Herpes simplex type 1 virus; (Rabbit); (Cerebrospinal fluid), 283
IgG antibody
–, Isoelectric point restriction; (Cerebrospinal fluid); (Serum); Measles virus polypeptide; Multiple sclerosis, 243
Immune complex
–, Multiple sclerosis; (Brain); Measles virus; Antigen; (Cross-reactive), 1
Immunocytochemical method
–, Keratan sulfate proteoglycan; Glycoconjugate; Mannose-rich; (Corpora amylacea); (Brain); Lectin-binding method, 49
Immunoprecipitating antibody
–, Human poliovirus; (Mice); ELISA antibody, 109
Immunosuppression
–, Cyclophosphamide; Multiple sclerosis; Lymphocyte, 161
–, Cyclophosphamide; Multiple sclerosis; Lymphocyte, T cell subset, 175
Interferon-γ
–, Astrocyte; HLA-DR antigen; Antigen-presenting cell; Interleukin-1, 123
Interleukin-1
–, Astrocyte; HLA-DR antigen; Interferon-γ; Antigen-presenting cell, 123
Interleukin-2
–, $CD4^+$ T cell; B lymphoid cell line; Multiple sclerosis, 75
Isoelectric point restriction
–, (Cerebrospinal fluid); IgG antibody; (Serum); Measles virus polypeptide; Multiple sclerosis, 243

Keratan sulfate proteoglycan
–, Glycoconjugate; Mannose-rich; (Corpora amylacea); (Brain); Immunocytochemical method; Lectin-binding method, 49

Lectin-binding method
–, Keratan sulfate proteoglycan; Glycoconjugate; Mannose-rich; (Corpora amylacea); (Brain); Immunocytochemical method, 49
Leu-2
–, CD8 gene; OKT8; Multiple sclerosis; Suppressor cell; Concanavalin A-induced suppressor cell, 183
Lymphoma
–, Paraproteinemia; Ganglioside, Polyradiculoneuropathy, 189

Macrophage
–, Schwann cell; Phagocytosis; Mycobacterium; Antiserum, 235
Major histocompatibility complex antigen, class 1
–, (Expression); (Detection); Neuroblastoma; (Murine); Ependymoblastoma; (Murine), 87
Measles virus
–, Multiple sclerosis; Immune complex; (Brain); Antigen; (Cross-reactive), 1
–, Polypeptide; Isoelectric point restriction; (Cerebrospinal fluid); IgG antibody; (Serum); Multiple sclerosis, 243

Memory
–, (Long-term); (Brain); Thy-1 antigen; Monoclonal antibody, 317
Monoclonal antibody
–, Autoimmune disease; T lymphocyte, 339
–, (Brain); Thy-1 antigen; Memory; (Long-term), 317
–, Chronic experimental allergic encephalomyelitis; T cell surface marker; (Guinea pig), 293
–, Neurofilament conformation; (Peroxidase-monoclonal antiperoxidase technique); Calcium-independent neurofilament protease, 149
–, Neurofilament triplet; Posttranslational heterogeneity; (Two-dimensional electrophoresis); (Peroxidase-monoclonal antiperoxidase technique), 135
Morbillivirus
–, Albumin leakage; (Cerebrospinal fluid); (Blood-brain barrier); Canine distemper, 61
Mucosal immunity
–, Multiple sclerosis; Viral antibody; (Tears), 197
Multiple sclerosis
–, CD8 gene; Leu-2; OKT8; Suppressor cell; Concanavalin A-induced suppressor cell, 183
–, Cyclophosphamide; Lymphocyte; Immunosuppression, 161
–, Immune complex; (Brain); Measles virus; Antigen; (Cross-reactive), 1
–, Immunosuppression; Cyclophosphamide; Lymphocyte; T cell subset, 175
–, Interleukin-2; $CD4^+$ T cell; B lymphoid cell line, 75
–, Isoelectric point restriction; (Cerebrospinal fluid); IgG antibody; (Serum); Measles virus polypeptide, 243
–, Trends in European Research; ECTRIMS Congress; (Announcement), 242
–, Viral antibody; (Tears); Mucosal immunity, 197
Muscle contraction
–, Autoimmunity; Acetylcholine receptor; Myasthenia gravis, 253
Myasthenia gravis
–, (Associated diseases); Anti-AChR antibody; (Thymus), 221
–, Autoimmunity; Acetylcholine receptor; Muscle contraction, 253
Mycobacterium
–, Schwann cell; Phagocytosis; Antiserum; Macrophage, 235
Myelin basic protein
–, Canine distemper virus; (Cerebrospinal fluid); Demyelination, 227
–, Relapsing experimental allergic encephalomyelitis; (Frequency analysis); (Compartmentalization); Antigen-reactive cell, 205
–, Theiler's murine encephalomyelitis virus; (Cerebrospinal fluid); Antibody against myelin basic protein; (Mice), 35

Neuritis, experimental allergic
–, Autoimmunity; T cell-deficient rat; (Peripheral nervous sytem), 267
Neuroblastoma
–, (Murine); Major histocompatibility complex antigen, class 1; (Expression); (Detection); Ependymoblastoma; (Murine), 87
Neurofilament conformation
–, Monoclonal antibody; (Peroxidase-monoclonal antiperoxidase technique); Calcium-independent neurofilament protease, 149
Neurofilament triplet
–, Posttranslational heterogeneity; (Two-dimensional electrophoresis); Monoclonal antibody; (Peroxidase-monoclonal antiperoxidase technique), 135
Neuroimmunology
–, Second International Congress; (Announcement), 122
–, Second International Congress; (Call for Abstracts), 241

OKT8
–, CD8 gene; Leu-2; Multiple sclerosis; Suppressor cell; Concanavalin A-induced suppressor cell, 183
Oligodendroglia
–, Galactocerebroside; Antibody; Peanut agglutination; (ELISA), 325

Paraproteinemia
–, Ganglioside; Polyradiculoneuropathy; Lymphoma, 189
Peanut agglutination
–, Galactocerebroside; Antibody; Oligodendroglia; (ELISA), 325
Phagocytosis
–, Schwann cell; Mycobacterium; Antiserum; Macrophage, 235
Poliovirus, human
–, (Mice); ELISA antibody; Immunoprecipitating antibody, 109
Polyradiculoneuropathy
–, Paraproteinemia; Ganglioside; Lymphoma, 189

Posttranslational heterogeneity
–, Neurofilament triplet; (Two-dimensional electrophoresis); Monoclonal antibody; (Peroxidase-monoclonal antiperoxidase technique), 135
Proteoglycan
–, Keratan sulfate; Mannose-rich; (Corpora amylacea); (Brain); Immunocytochemical method; Lectin-binding method, 49

Radiation
–, Theiler's virus; Hepatitis virus; (Mouse), Demyelinating disease, Viral reactivation, 19
Retinal S antigen
–, (Purification); (Ion-exchange chromatography); Experimental allergic uveoretinitis, 99

Schwann cell
–, Phagocytosis; Mycobacterium; Antiserum; Macrophage, 235
Suppressor cell
–, CD8 gene; Leu-2; OKT8; Multiple sclerosis; Concanavalin A-induced suppressor cell, 183

T cell deficiency
–, (Rat); Autoimmunity; Experimental allergic neuritis; (Peripheral nervous system), 267
T cell subset
–, Immunosuppression; Cyclophosphamide; Multiple sclerosis; Lymphoctye, 175
T cell surface marker
–, Chronic experimental allergic encephalomyelitis; Monoclonal antibody; (Guinea pig), 293
Theiler's murine encephalomyelitis virus
–, Myelin basic protein; (Cerebrospinal fluid); Antibody against myelin basic protein; (Mice), 35
Theiler's virus
–, Radiation; Hepatitis virus; (Mouse); Demyelinating disease; Viral reactivation, 19
Thy-1 antigen
–, (Brain; Monoclonal antibody; Memory; (Long-term), 317
T lymphocyte
–, Monoclonal antibody; Autoimmune disease, 339

Uveoretinitis, experimental allergic
–, Retinal S antigen; (Purification); (Ion-exchange chromatography), 99

Viral antibody
–, Multiple sclerosis; (Tears); Mucosal immunity, 197
Viral reactivation
–, Radiation, Theiler's virus; Hepatitis virus; (Mouse); Demyelinating disease, 19
